

Veri-fy Face-to-Face identity checking service

PaperFree options to support e-Bulk transaction processes

As we move to e-Bulk, an increasing number of Veri-fy's clients are asking for an automated and paperless way of transacting with us.

We can provide a number of solutions:

Form creation and distribution

Veri-fy Form Download Link

Using this service you can provide applicants with a download link, either on a webpage or by email. The link will automatically generate a form for the user, which has a unique reference number, and is correctly barcoded.

This is a standard service, available at no extra charge

Veri-fy Pre-populated Form

We can provide a VeriFy form with a "Blank" section to enable you to create your own PDF files for sending to applicants. This requires you to have the ability to automatically edit/construct PDF files.

This is a standard service, available at no extra charge

Veri-fy Pre-populated Form Download Link

We can accept applicant details from you as an XML message, and we can construct the personalised and pre-populated PDF file for you, and either return the form in a HTTP message, via email or ftp, or provide you with a link for the form to send to the applicant.

This is a premium service, available for an extra fee, please ask us for a quote.

Notification of Form usage

We can provide to you on a daily basis, a data feed in a number of formats (XML, CSV, Fixed length text etc.) via a number of transfer protocols (email, ftp, HTTP) as is appropriate.

The data feed will have one row per form used on the previous day, and will be in the following format:

00 H, 0000, 0640123, 260610, 982693800127001299

Receipt Reference, Transaction Reference, Post Office Code (branch identifier), Usage Date, Form Number

The form number is the barcode and it breaks down thus:

| | |
|-----------------------|--------------------|
| 8 numeric characters: | System |
| 1 numeric character: | Panel Manager |
| 3 Numeric Characters: | Company reference |
| 5 Numeric Characters: | Form Serial Number |
| 1 numeric character: | Checkdigit |

Some of this data may be surplus to your requirements. Clearly, you could just discard it, or we could excise it before sending to you.

This is a standard service available at no extra cost.

Visual confirmation of the Veri-fy Form

We can receive your physical Veri-fy forms back at our offices, where we will scan them and email them to you, along with notification of any applicants that failed identity verification.

Alternatively, they can be scanned and uploaded into your private administration console on the Veri-fy web-site.

Both of these features are premium services, and are charged on a per form basis, please ask us for a quote.
